Product philosophy

I take frontier AI from demo to production in messy, multi-market businesses. At Delivery Hero I lead Growth & AI for quick commerce across 75 countries, now 19% of the group's GMV. And I build what I talk about: fustat.ai, an AI evaluation product with 20 customers in its first month, and korba.ai, a visual builder for AI workflows with 600 users.

Experience
