awafaey0.github.io

I take frontier AI from demo to production in messy, multi-market businesses. At Delivery Hero I lead Growth & AI for quick commerce across 75 countries, now 19% of the group's GMV, where I founded the AI practice and led the move from store-first to item-first. And I build what I talk about: **fustat.ai**, an AI evaluation product with 20 customers in its first month; **korba.ai**, a visual builder for AI workflows with 600 users; and **rituals.pm**, where product managers learn to ship with AI.

EXPERIENCE

Applied AI at scale
